

SLICKER THAN METAL.
TOUGHER THAN RUST.
CLEANER THAN WAX.

A REVOLUTIONARY SURFACE
UPGRADE FOR YOUR
WOODWORKING TOOLS.
SAY GOODBYE TO RUST AND WAX
WITH SHOPSTICK™
YOUR ULTIMATE GLIDE SOLUTION.

WHY SHOPS LICK ?

SHOPS LICK™ IS A HIGH-PERFORMANCE UHMW POLYMER ENGINEERED TO GIVE YOU A SURFACE THAT IS SLICKER THAN POLISHED STEEL, IMPERVIOUS TO MOISTURE, AND GLUE-PROOF. FOLLOW THESE STEPS FOR A PROFESSIONAL, "BETTER-THAN-FACTORY" RESULT.

ZERO FRICTION GLIDE

LOWER COEFFICIENT OF FRICTION THAN FACTORY-POLISHED METAL.

RUST & MOISTURE PROOF

CREATES A PHYSICAL BARRIER AGAINST HUMIDITY, SPILLS, AND SWEAT.

MOST GLUE WON'T STICK

WILL POP RIGHT OFF. MANY LEAVE ZERO STAINING AND DO NOT INTERFERE WITH THE SLICK PERFORMANCE.

WRITE THEN WIPE CLEAN

USE A SHARPIE® TO MARK DIRECTLY ON THE SURFACE. WIPES CLEAN IN SECONDS.

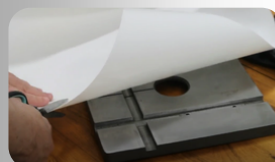

RENEWABLE ARMOR

PEEL IT OFF, REVEAL LIKE-NEW METAL, AND APPLY A FRESH PIECE.

1 CLEAN

REMOVE ALL WAX, DIRT, AND OILS. WIPE THE SURFACE WITH DENATURED ALCOHOL OR ACETONE UNTIL A CLEAN WHITE CLOTH COMES AWAY WITH NO RESIDUE. LET DRY.

2 SIZE

ROUGH CUT THE SHOPS LICK™ SHEET ABOUT 1/2" LARGER THAN THE AREA YOU ARE COVERING.

3 LAYOUT

PEEL BACK A SMALL AMOUNT OF THE BACKING PAPER. ALIGN THE LEADING EDGE WITH THE FRONT OF YOUR TABLE.

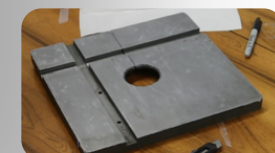

4 GLIDE

SLOWLY PULL THE BACKING PAPER AWAY WHILE PRESSING THE FILM DOWN. USE A SQUEEGEE OR CLOTH TO PUSH OUT AIR BUBBLES.

5 TRIM

USE A SHARP RAZOR KNIFE TO TRIM EDGES AND OPENINGS FLUSH. CUT MITER SLOTS AND INSERT AREAS FOR A PERFECT FIT.

6 FINISH

YOU'RE DONE! ENJOY A SLICKER, CLEANER, RUST-FREE SURFACE THAT PERFORMS BETTER EVERY DAY.

PEEL. STICK. GLIDE. DONE

BUILT BY WOODWORKERS.
FOR WOODWORKERS.

INSTALLATION MADE EASY

PEEL & STICK IN MINUTES

CLEAN

REMOVE ALL WAX, DIRT, AND OILS. WIPE THE SURFACE WITH DENATURATED ALCOHOL OR ACETONE UNTIL A CLEAN WHITE CLOTH COMES AWAY WITH NO RESIDUE. LET DRY.

SIZE

ROUGH CUT THE SHOPSlick™ SHEET ABOUT 1/2" LARGER THAN THE AREA YOU ARE COVERING.

LAYOUT

PEEL BACK A SMALL AMOUNT OF THE BACKING PAPER. ALIGN THE LEADING EDGE WITH THE FRONT OF YOUR TABLE.

GLIDE

SLOWLY PULL THE BACKING PAPER AWAY WHILE PRESSING THE FILM DOWN. USE A SQUEEGEE OR CLOTH TO PUSH OUT AIR BUBBLES.

TRIM

USE A SHARP RAZOR KNIFE TO TRIM EDGES AND OPENINGS FLUSH. CUT MITER SLOTS AND INSERT AREAS FOR A PERFECT FIT.

FINISH

YOU'RE DONE! ENJOY A SLICKER, CLEANER, RUST-FREE SURFACE THAT PERFORMS BETTER EVERY DAY.

8 BRILLIANT WAYS TO USE YOUR TRIMMINGS & SCRAPS

THE SHOPSlick™
"WASTE-NOT" SHOP-HACK SHEET

1 EVERY MACHINE TABLE

DO YOU HAVE A SCROLL SAW, BAND SAW OR OTHER TOOLS THAT WOULD BENEFIT FROM A LOWER FRICTION SURFACE AND AVOID RUST? NOW IS THE TIME TO COVER THEM TOO.

2 THE "FLOATING" DRAWER HACK

DO YOU HAVE AN OLD WOODEN DRESSER OR A SHOP CABINET WHERE THE DRAWERS "STICK" OR "CHATTER"? APPLY A 1/2" STRIP OF SHOPSlick™ TO THE BOTTOM RUNNERS OF THE DRAWER. IT WILL SLIDE LIKE IT'S ON BALL BEARINGS, EVEN WHEN FULLY LOADED.

3 THE "FRICTIONLESS" MITER BAR

IF YOUR MITER GAUGE OR CROSS-CUT SLED IS WOBBLY IN THE SLOT, APPLY A THIN STRIP OF SHOPSlick™ TO THE SIDES OF THE RUNNER. IT ELIMINATES "SLOP" WHILE PROVIDING A BUTTERY-SMOOTH GLIDE.

4 THE "ZERO-DRAW" ROUTER BASE

APPLY SCRAPS TO THE BOTTOM OF YOUR ROUTER'S SUB-BASE. IT ELIMINATES MOST FRICTION GIVING YOU TOTAL CONTROL ON INTRICATE EDGE PROFILES.

5 THE "ANTI-GLUE" CAUL

WHEN DOING COMPLEX GLUE-UPS, WRAP YOUR WOODEN CLAMPING CAULS IN SHOPSlick™ SCRAPS. NO MATTER HOW MUCH GLUE SQUEEZES OUT, THE CAULS WILL POP RIGHT OFF THE PROJECT ONCE THE GLUE IS DRY.

6 THE "SILENT" SLIDING DOOR

APPLY A STRIP TO THE TRACK OF SLIDING CLOSET DOORS OR WINDOWS. IT ELIMINATES THE "METAL-ON-METAL" SCREECH AND MAKES THE DOORS MOVE WITH A FINGER'S TOUCH.

7 THE "SPEED-FEED" FENCE

DON'T JUST DO THE TABLE! APPLY YOUR LEFTOVER STRIPS TO THE FACE OF YOUR RIP FENCE. THIS ENSURES THE WOOD MOVES Laterally WITH ZERO RESISTANCE, WHICH IS CRITICAL FOR PREVENTING "BURN MARKS" ON LONG RIPS.

8 THE "SMOOTH-ACTING" HAND PLANE

FOR HAND PLANES THAT TEND TO "DRAG" ON RESINOUS WOOD, APPLY A THIN LAYER OF SHOPSlick™ TO THE SOLE (BEING CAREFUL TO TRIM AROUND THE MOUTH). YOU'LL BE ABLE TO TAKE SHAVINGS WITH HALF THE EFFORT. IT CAN ALSO IMPROVE THE BOTTOM OF A PITTED OR WORN METAL PLANE.

ADVANCED BENEFITS:

GLUE RESISTANT SURFACE

WOOD GLUE (PVA) AND MOST CA GLUES WON'T BOND. LET IT DRY AND POP IT OFF.

BUILT-IN NOTEPAD

WRITE MEASUREMENTS AND LAYOUTS WITH A SHARPIE®. WIPES CLEAN IN SECONDS.

HIGH-MOISTURE LUMBER

GREEN OR DAMP WOOD GLIDES EFFORTLESSLY WITH ZERO SECTIONS OR STUTTER.

MAINTENANCE TIP:

For general cleaning, a dry microfiber cloth is all you need. For stubborn pitch or sap from pine, use a small amount of mineral spirits. Avoid using heat-guns or setting hot tools on the surface.

FREQUENTLY ASKED QUESTIONS (FAQ)

Q: WILL THIS AFFECT THE ACCURACY OF MY DEPTH-OF-CUT OR FENCE SCALES?

A: AT ONLY 0.009" (9 MIL) THICK, SHOPSlick™ IS ROUGHLY THE THICKNESS OF A HIGH-QUALITY SHEET OF PAPER. FOR MOST WOODWORKING, THIS IS NEGLIGIBLE. IF YOU REQUIRE AEROSPACE PRECISION, SIMPLY "ZERO" YOUR BLADE OR FENCE AFTER INSTALLATION.

Q: WHAT IF I ACCIDENTALLY NICK THE SURFACE WITH A CHISEL OR MY BLADE?

A: SHOPSlick™ IS A "SACRIFICIAL" LAYER. IT IS DESIGNED TO TAKE THE DAMAGE, SO YOUR EXPENSIVE MACHINE TABLE DOESN'T HAVE TO. IF A SECTION BECOMES HEAVILY GOUGED, SIMPLY PEEL IT OFF AND REPLACE IT WITH A FRESH PIECE.

Q: HOW DO I REMOVE IT IF I WANT TO SELL MY MACHINE?

A: LIFT A CORNER AND PEEL BACK SLOWLY. OUR NON-GHOSTING ADHESIVE IS DESIGNED TO RELEASE CLEANLY. YOUR TABLE WILL LOOK EXACTLY AS IT DID THE DAY YOU COVERED IT, PRESERVING YOUR MACHINE'S RESALE VALUE. IF IN A RARE OCCASION THERE IS A BIT OF RESIDUE LEFT THOUGH, IT WILL CLEAN UP EASILY WITH A PLASTIC SCRAPER AND SOME ALCOHOL OR ACETONE.

Q: CAN I USE IT ON MY JOINTER OR PLANER TABLES?

A: ABSOLUTELY. IT IS HIGHLY RECOMMENDED FOR JOINTER BEDS AND FENCES TO ELIMINATE THE "GRAB" THAT OFTEN HAPPENS WITH LONG, HEAVY BOARDS. ON ALL JOINTERS, YOU MAY WANT TO ADJUST YOUR KNIVES OR OUTFEED TABLE FOR THE 9MIL THICKNESS OF THE MATERIAL.

Q: CAN I PUT THIS ON THE BOTTOM OF MY CROSS-CUT SLED?

A: YES! APPLYING SHOPSlick™ TO THE BOTTOM OF JIGS AND SLEDS PROVIDES A "FLOATING ON AIR" FEEL THAT MAKES YOUR SHOP SAFER AND MORE PRECISE.
